Processes/Activities/Strategies

- **New vocabs** (2_U2P1)

- Learn the names of numbers: read it out loud.

- **Guessing game**

- Have the numbers on the board (2_U2P1). The teacher has a number in mind and asks students to guess the number using Model Conversation 1.

Once a student gets the correct number, the student guesses another number.

Next step: Get rid of some numbers, then no numbers.

- **Number animal farm**

- Have the numbers on the board. (2_U2P1) Set a magic number and an animal sound, and students stand in a circle. In turn, each student says a number from 1- 10 in order repeatedly. The student with the magic number sits down as they say an animal sound. See who is the last person standing. A student who says the wrong number will sit down as well. Try without the numbers on the board.

- **Counting on**

- 'yeol' is 10, 'hana' is 1. Then what would be 11? Counting on is easy once students figure out 'yeol hana'. 'yeol' and add the numbers to count teens number.

- **Conversation**

- 'sal' is the counting word for age. 7 years old is "ilgop sal". Learn the Model Conversation 2. Go around and make conversation with friends. Try to ask siblings' ages by adding members of the family in front of the model conversation. e.g. nuna/eonni myeot sarieyo?

- **Extension activities**

- Let's write - Writing new vocabularies in Korean (2_U2E1)
- Let's find - Finding new vocabularies in Korean (2_U2E2)
