Processes/Activities/Strategies

- **New vocabs (2_U9P1)** - Learn the new numbers: sino number
- **Number guessing game**
 1. Have the PPT on.
 2. Teacher will have a number between 1-10 in mind and ask students to guess.
If yes say, 'ne', if no say 'aniyo'.
 3. Teacher will lead the game for about 3-4 rounds.
 4. Ask a student to lead the game. Whoever guesses the correct number will lead the next round.
 5. Turn the PPT off and challenge each other.
- **Around the world**
The purpose of the game is for students to say a number in the target language. For example, the teacher says 'four' and the students need to answer 'sa', and vice versa.
 1. The whole class will sit in a circle and the teacher picks a student to start the game.
 2. Student A is to stand in front of a student. When they are ready, Student A will say a random number in English or Korean.
 3. If the student gets it correct, Student A moves on to the next student on the left. But if the student who is sitting down answers quicker, that student becomes Student A.
 4. The student who goes around the circle the longest is the winner. Praise them by giving them house points, stickers or a special prize.
- **Play bingo**
 - Now students are familiar with the new numbers, play bingo.
 - On a paper or in their book, draw a 3x3 grid. Write down numbers between 1-9.
 - Teacher will call out the number in Korean, and students will cross it out on their grid. The first student who gets a line of 3 will call Bingo and be the next caller.
 - Each time draw a new grid.
- **Extension bingo**
 - Ask what will be 11, 12, 13... Count 1-20. (It is straightforward.) Play teens number bingo.
 - Ask what will be 30, 40, 50... Count 10s. Play tens number bingo.
 - Draw 5x5 grid to play bingo using numbers between 1-99.
- **Role play - (2_U9P2)**
 - Show the school phone number or a well known phone number like Pizza Hut.
 - Teacher models Model Conversation 1.
 - Explain when to use 'yeyo.' (number ends with a vowel) and 'ieyo' (number ends with a consonant).
 - Students can choose whether to share their real telephone number or to make one up.
 - Ask 3 different students to share a telephone number.
 - Teacher models Model Conversation 2.
 - Put the PPT on and ask students to make conversations with 3 different students.
 - Ask 3-4 students to share their conversation.
- **Interview (2_U9P3)** - saengil: birthday, eonje: when, wol*: month, il: date
* For June, it is 'yu wol' not 'yuk wol'. For October, it is 'si wol' not 'sip wol'.
 - In Korean when we say our birthday, the month comes first and then the date. If the year is mentioned, the year comes first.
- **Extension activities**
